

**University of Johannesburg**  
**Academy of Computer Science & Software Engineering**  
**IFM2A10: Informatics 2A – Database Design**  
**Practical Assignment 3**  
**Due: ~ 20 March @ 23:59**

## Assignment

The University has given you a relationship view of how tables should be linked and was kind enough to provide you with the tables and some test data.

The University would like to keep track of a student's mark and asked you to add it to the database.

**Complete** and **save** the following **SQL queries**:

- Create the necessary tables and relationships for the University, and create all the necessary fields (select appropriate data types). Name this query "**A1**", "**A2**", etc.
- Add the information from the provided tables into your database. Name this query "**B1**", "**B2**", etc.
- List all the Degrees that are linked to a student. Name this query "**C**".
- List all the students that have registered for IFM2A and CSC2A. Name this query "**D**".
- List all the students that have registered for IFM2A or CSC2A. Name this query "**E**".
- List the number of students registered for each Degree. Name this query "**F**".
- List the average mark for each subject. Name this query "**G**".
- List all the degrees that have no students. Name this query "**H**".
- List the number of modules linked to each degree. Name this query "**I**".

## Instructions

- The database should be stored in a folder named using the following named using your student number followed by the practical identifier, eg. 212345678\_P01
- Each query should be saved and named based on the query indetifier, eg. Query A, QueryB\_1
- Submission details are outlined in the General Undergraduate Learning Guide. Please ensure that the submission complies with the instructions therein.

## Mark Allocation

Query A	
Query B	
Query C	
Query D	
Query E	
Query F	
Query G	
Query H	
Query I – Bonus	
Total	
Penalties <ul style="list-style-type: none"><li>• Late submission [0%]</li></ul>	

Bonus: solve the riddle in session.

In the land where the sun shines bright, As autumn leaves take their flight. On the third of April, with the morning light, At ten o'clock, I'm in sight.

What am I, shining bright?
